

## INDUSTRIAL PRODUCTION INDICES IN AUGUST 2016<sup>1</sup>

According to the preliminary data the Industrial Production Index<sup>2</sup>, seasonally adjusted<sup>3</sup>, increased by 0.7% in August 2016 as compared to July 2016.

In August 2016 working day adjusted<sup>4</sup> Industrial Production Index rose by 2.6% in comparison with the same month of 2015.

**Figure 1. Industrial Production Indices (2010 = 100)**

<sup>1</sup> August 2016 data are preliminary.

<sup>2</sup> Monthly Industrial Production and Industrial turnover indices measure changes in production and turnover values of industrial enterprises. This information can be used to assess the current economic development and for short-term forecasts. Indices do not measure the actual production level, it aims to measure the average change in value of production between two points of time. Indices are compiled on the base of information collected through representative sampling survey on industrial enterprises. The sample covers enterprises with annual turnover more than 97% of total turnover in industry.

Industrial production indices are calculated at constant base year that is to say they are weighted with the structure of the value added at factor costs in the base year.

<sup>3</sup> Seasonal adjustment is a statistical method, which eliminates the seasonal component of time series.

<sup>4</sup> Working day adjustment is an adjustment for variations caused by calendar effects, different number of calendar and working days in the months, national holidays and outliers (for example the presence of more non-working days in May could contribute to the decline in the production in some activities).

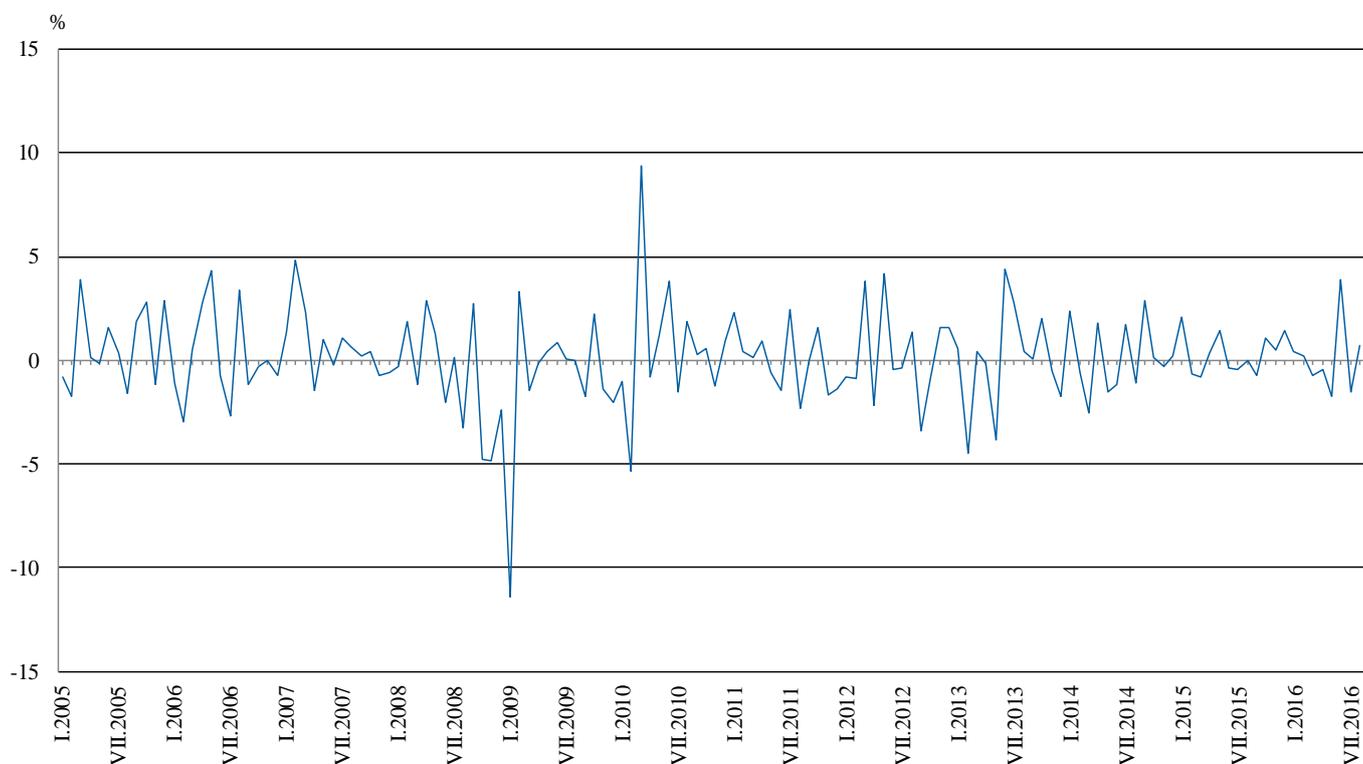

## Monthly comparisons

In August 2016 as compared to July 2016, the seasonally adjusted Industrial Production Index increased in the electricity, gas, steam and air conditioning supply by 0.9%, in the manufacturing by 0.8% and in the mining and quarrying industry by 0.1%.

The most significant increases of production in the manufacturing were registered in the manufacture of other transport equipment by 23.0%, in the manufacture of motor vehicles, trailers and semi-trailers by 8.6%, in the manufacture of other non-metallic mineral products by 3.7%, in the manufacture of fabricated metal products, except machinery and equipment by 3.2%. There were decreases in the manufacture of leather and related products by 8.7%, in the repair and installation of machinery and equipment by 8.3%, in the manufacture of machinery and equipment 4.4%, in the manufacture of furniture by 3.6%.

**Figure 2. Changes of Industrial Production Indices compared to the previous month  
(Seasonally adjusted)**

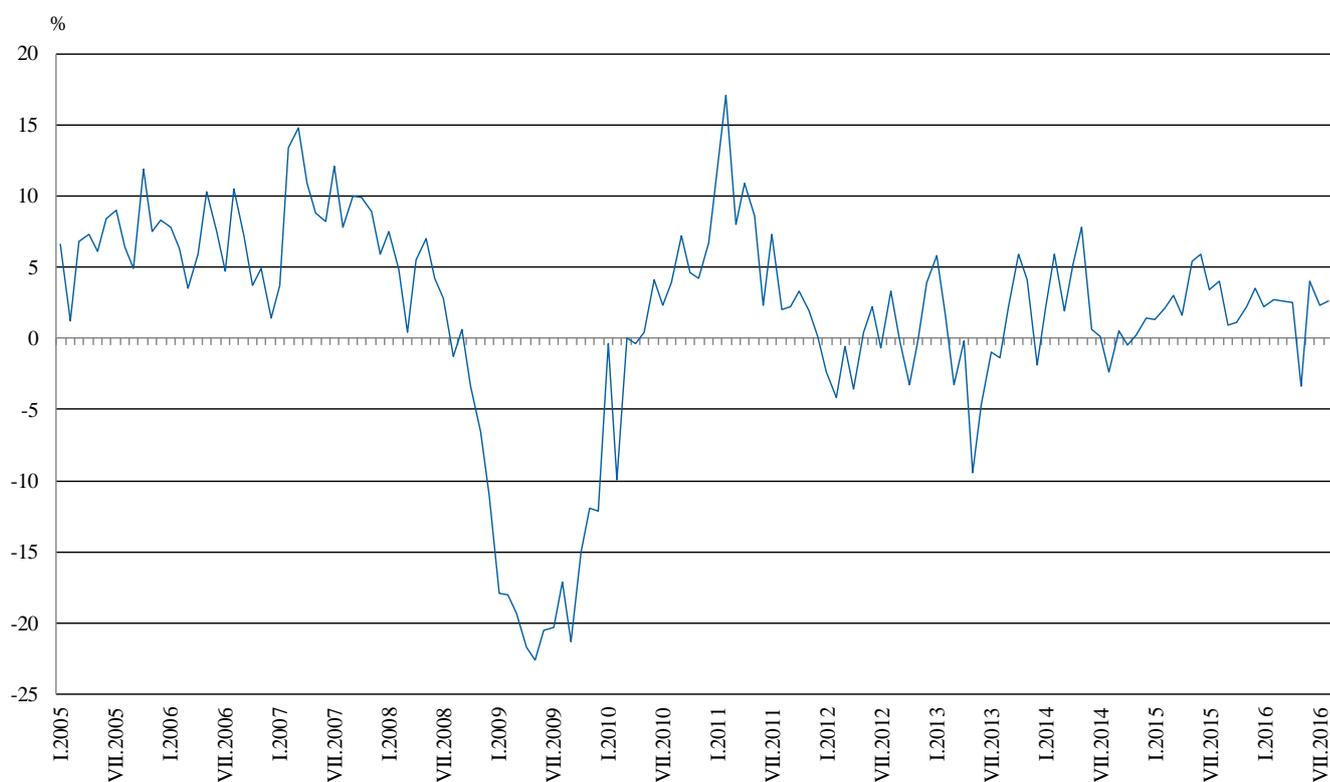

### Annual comparisons

On annual basis in August 2016 Industrial Production Index calculated from working day adjusted data increased in the manufacturing by 4.5% and in the mining and quarrying industry by 1.8%, while in the electricity, gas, steam and air conditioning supply a decrease by 1.2% was registered.

In the manufacturing, the more significant increases compared to the same month of the previous year were seen in the manufacture of motor vehicles, trailers and semi-trailers by 24.8%, in the manufacture of fabricated metal products, except machinery and equipment by 18.3%, in the manufacture of paper and paper products by 10.7%, in the manufacture of food products by 8.2%. Decreases were registered in the manufacture of leather and related products by 19.6%, in the manufacture of tobacco products by 18.3%, in the manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials by 8.5%, in the manufacture of basic pharmaceutical products and pharmaceutical preparations by 6.7%.

**Figure 3. Changes of Industrial Production Indices compared to the same month of the previous year (Working day adjusted)**

The final data on Industrial Production and Turnover Indices for July 2016 can be found on the NSI website: <http://www.nsi.bg/en>.
