

SERVICES PRODUCTION INDICES IN DECEMBER 2024

In December 2024, the total production index in **Services of the business economy**¹ increased by 2.1% compared to the previous month. The data are preliminary and seasonally adjusted.

Compared to December 2023, an increase of 6.0% was registered in the calendar-adjusted index according to preliminary data.

Figure 1. Production indices for Business services (2021 = 100)

 $^{^1}$ Business services include the following sectors from NACE.BG - 2008: H - Transportation and storage, I - Accommodation and food service activities, J - Information and communication, L - Real estate activities, M_STS - Professional, scientific and technical activities (specific grouping under Regulation (EU) 2019/2152), and N - Administrative and support service activities.

Monthly changes

An increase, compared to the previous month, was reported in the following sectors: 'Real estate activities' - by 16.8%, 'Transportation and storage' - by 3.8%, and 'Information and communication' - by 3.2%. A decline was seen in three sectors: 'Administrative and support service activities' - by 6.2%, 'Accommodation and food service activities' - by 0.4% and 'Professional, scientific and technical activities' - by 0.2%.

Figure 2. Changes of production indices for Business services compared to the previous month (Seasonally adjusted data)

Annual changes

On an annual basis, a rise was observed in the following sectors: 'Transportation and storage' - by 10.1%, 'Information and communication' - by 9.3%, 'Real estate activities' - by 6.0%, 'Professional, scientific and technical activities' - by 3.9%, and 'Accommodation and food service activities' - by 0.1%. A decrease was reported in the sector 'Administrative and support service activities' - by 2.3%.

Figure 3. Changes of production indices for Business services compared to the same month of the previous year (Calendar-adjusted data)

Methodological notes

Monthly indices of production in services are calculated and published two months after the reference period (M+2) in accordance with the requirements of Regulation (EU) 2019/2152 of the European Parliament and of the Council for European Business Statistics.

Production indices in services are calculated by deflating the turnover indices for each activity with the corresponding producer price indices. The purpose of the production index is to measure changes in the output volume at monthly intervals. The indices are calculated with 2021 as a base year.

Seasonal adjustment is a statistical method which eliminates the seasonal component of time series.

Calendar adjustment is an adjustment for variations caused by calendar effects, a different number of calendar and working days in the months, national holidays and outliers (for example, the presence of more non-working days in May could contribute to the decline in some activities). Since July 2024, all dynamic rows have been recalculated based on 2021 as base year and have been published in IS Infostat.
